

LEGEND

- Choice step (multi-button)
- Email capture (Mystery Deal reveal)
- Open-text step
- End state (no further steps)
- Reference — step already expanded elsewhere in this tree
- FACTS — Real informational content shown above the buttons (checklist / spec grid / comparison table)

1 · FLOW TREE

Traversal follows Step 1's button order. Steps reached more than once (2, 10, 11, 12) are fully expanded only at their first occurrence — later arrows note "see above" rather than repeating the subtree.

4 CHOICE What are you comparing?

JB Racks vs. other brands → **Step 15**

Our own models against each other → **Step 16**

15 CHOICE FACTS What actually matters when comparing racks — the 4 specs worth checking on any rack (weight rating, hitch fit, wobble control, warranty) and where JB Racks lands on each.

Got it — find my size → **Step 10** (*see above*)

16 CHOICE LIVE TABLE Compare our 4, 5 & 6-bike racks — live pricing table rendered from the real rackSizes prop (bikes carried, best-for, price, savings) — not static copy, always matches current ISR-cached price.

Pick my size → **Step 10** (*see above*)

7 OPEN TEXT "Tell us in your own words — what's the one thing stopping you?"

Submit Reason → **Step 8 (End)** — reasonText POSTed to /api/quiz-submit, emailed to reed@jbracks.com (no Klaviyo call — no email captured on this path)

2 · TERMINAL STATES

STEP	REACHED FROM	CONTENT
8	Step 7 (any open-text submission)	"Thanks for answering our questions." — points to reed@jbracks.com for further pre-purchase questions.
9	Step 2 → "No / still not sure"	"No 2-inch hitch yet." — explains it's a common, inexpensive install at most auto shops, invites them back once fitted, or to email support@jbracks.com.
17	Step 3 → "I've got true fat-tire bikes"	"Our racks aren't built for true fat-tire bikes." — honest disqualification (wheel holders top out at 3" wide), invites reed@jbracks.com if only one bike in the mix is a fat-tire.

3 · STEP-BY-STEP CONDITIONAL REFERENCE

Every button in the funnel, its side effects (flags set), and where it routes. This is the ground truth — `quizFunnel.ts` is the single source, `QuizFunnel.tsx` only renders it.

STEP	TYPE	QUESTION / HEADING	BUTTON	FLAGS SET	NEXT
1	Choice	What would help you decide?	Vehicle Fit Confirmation	—	2
			Bike Compatibility	—	3
			Comparing Price/Options	—	4
			Buying Later (Not Urgent)	—	10
			Other	—	7
2	Choice CHECKLIST	Do you have a 2-inch hitch?	Yes, I've got one	—	10
			No / still not sure	—	9 (End)
3	Choice FACTS	Will your bikes actually fit?	Yep, my bikes fit this	—	2
			I've got true fat-tire bikes (4" + tires)	—	17 (End)
4	Choice	What are you comparing?	JB Racks vs. other brands	—	15
			Our own models against each other	—	16
15	Choice FACTS	What actually matters when comparing racks	Got it — find my size	—	10
16	Choice LIVE TABLE	Compare our 4, 5 & 6-bike racks	Pick my size	—	10
10	Choice	How many bikes do you need to carry?	1-4 bikes	bikeCount = 4	11
			5 bikes	bikeCount = 5	11
			6 or more bikes	bikeCount = 6	11
11	Choice	Want your rack to ease down slow and controlled, instead of slamming down?	Yes, that matters to me	wantsStrut = true	12
			Not fussed either way	—	12
12	Choice	Want a dedicated spot to keep it stored neatly when it's off the car?	Yes, I'd like that	wantsStand = true	6
			No, I've got storage sorted	—	6
			Not sure yet	wantsStand = true	6
6	Email capture	MYSTERY DEAL: UNLOCKED	Reveal the Offer (submit)	—	submit →
			No I'm still not ready (decline)	—	closes
7	Open text	Tell us in your own words — what's stopping you?	Submit Reason	—	8 (End)

4 · WHAT HAPPENS ON SUBMISSION (STEP 6 & STEP 7)

DESTINATION	TRIGGER	PAYLOAD / BEHAVIOR
GA4	Every button click	quiz_answer fires on each choice (step, question, answer). quiz_complete fires on final submission (Step 6 or Step 7), with the full path and outcome type.
/api/quiz-submit	Step 6 submit, or Step 7 submit	POSTs the full answers map plus name/email/reasonText/recommendedRack/recommendedAddons.

Klaviyo	Step 6 submit only (needs email)	Upserts profile + logs "Quiz Completed" event with every answer as a property, plus a dedicated quiz_recommendations property (array of add-on names) when Slow-Fold Strut and/or Garage Stand were flagged.
Resend	Every submission (Step 6 or Step 7)	Lead notification email to reed@jbracks.com with the answers, name/email (if given), and recommended rack + add-ons.

Auto-generated from `src/lib/quizFunnel.ts` — the single source of truth for the funnel. If the flow changes, re-generate rather than hand-editing this document.
